

THERMOS®

Hotter, Cooler, Fresher & Longer ...

Light & Compact Stainless Steel Flask FBB series

- TherMax® double walled vacuum insulation for maximum temperature retention, hot or cold
- Light and compact design allows larger capacity in a smaller bottle
- Dent resistant stainless steel body for ultimate durability
- Unique two-piece flip top allows for easy pouring and cleaning

"Heat retention and resistance to dents increase the price of Thermos flasks."

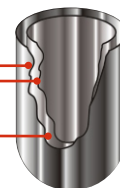

"In Helsingin Sanomat test the best heat retention was offered by Thermos light & compact. It held boiling hot water in 69(celcius) degrees after 12 hours."

Sami Simola
Helsingin Sanomat
(Publication in Finland)
